Comprehension:

Read the following passage and answer the questions given after it.

A Hindu temple, believed to have been constructed 1,300 years ago, has been discovered by Pakistani and Italian archaeological experts at a mountain in northwest Pakistan's Swat district. The discovery was made during an excavation at Barikot Ghundai. Announcing the discovery on November 19, 2020, Fazle Khaliq of Khyber Pakhtunkhwa Department of Archaeology said that the temple discovered is of Lord Vishnu. It was built by the Hindus 1,300 years ago during the Hindu Shahi period, he said. The Hindu Shahis or Kabul Shahis (850-1026 CE) was a Hindu dynasty that ruled the Kabul Valley (eastern Afghanistan), Gandhara (modern-day Pakistan), and present-day northwestern India. During their excavation, the archaeologists also found traces of cantonment and watchtowers near the temple site. The experts also found a water tank near the temple site which they believe was used by the Hindus for bathing before worship. Khaliq said that Swat district is home to a thousand-year-old archaeological sites and the traces of the Hindu Shahi period have been found for the first time in the area. Dr. Luka, the head of the Italian archaeological mission, said this was the first temple of the Gandhara civilisation discovered in Swat district. Swat district is among the top 20 sites in Pakistan which is home to every kind of tourism such as natural beauty, religious tourism, cultural tourism and archaeological sites. Several places of worship of Buddhism are also situated in Swat district.

SubQuestion No : 63

Question ID : 9767556571

Status : **Answered**

Chosen Option : 4

Comprehension:

Read the following passage and answer the questions given above.

Nain Singh Rawat (1830-1882) was one of the 19th century Indian explorers who explored the Himalayas for the British. He hailed from the Johar Valley of Kumaon. He is known to be the first Indian explorer to survey Tibet, determine the exact location and altitude of Lhasa, map the Tsangpo (Brahmaputra River) and also give the details of the gold mines of Thok Jalung.

In his youth, Rawat left school and explored different centres in Tibet along with his father. During his exploration, he became familiar with Tibetan people and learnt the language and customs. Later, these same skills sets came handy when he worked as a 'spy explorer'.

In 1855, Rawat was first recruited by German geographers, the Schlagintweit brothers to explore and survey India. Rawat's first exploration trip with the Germans was between 1855 and 1857, when he travelled to Lakes Manasarovar and Rakas Tal and then further to Gartok and Ladakh.

In 1863, Nain Singh Rawat and his cousin, Mani Singh Rawat, were sent to the Great Trigonometric Survey office in Dehradun where they underwent training for two years. This included training on the use of scientific instruments and ingenious ways of measuring and recording and the art of disguise. They were drilled to take steps of a fixed length which remained constant even while climbing up, down, or walking on a level surface. They were trained to record the distances by counting their steps. A mile was calculated to be around 2,000 steps. To avoid suspicion, these explorers went about their task disguised as monks or traders or whatever suited the situation.

Thus, prepared and trained, the explorers travelled for months at a stretch, collecting intelligence under the most difficult conditions, travelling closely with the natives in caravans. What was to follow were some of the most glorious years in the exploration and mapping of Tibet and all its river systems.

In 1865-66, Nain Singh travelled 1200 miles from Kathmandu to Lhasa and then to Lake Manasarovar and back to India.

On a second voyage, in 1867, Singh explored western Tibet and visited the legendary Thok Jalung gold mines. He noticed that the workers only dug for gold near the surface, because they believed digging deeper was a crime against the Earth and would deprive it of its fertility.

His last and greatest journey was from Leh in Ladakh via Lhasa to Assam in 1873-75. For his extraordinary achievements and contributions, Nain Singh was honoured with many awards by the Royal Geographical Society.

SubQuestion No : 67

Q.67 Nain Singh had to disguise himself as a monk or trader mainly because:

- Ans**
- 1. he was mapping the areas in the Himalayas
 - 2. he was working for the British
 - 3. he travelled with the natives in a caravan
 - 4. he was collecting intelligence along with his exploration

In 1855, Rawat was first recruited by German geographers, the Schlagintweit brothers to explore and survey India. Rawat's first exploration trip with the Germans was between 1855 and 1857, when he travelled to Lakes Manasarovar and Rakas Tal and then further to Gartok and Ladakh.

In 1863, Nain Singh Rawat and his cousin, Mani Singh Rawat, were sent to the Great Trigonometric Survey office in Dehradun where they underwent training for two years. This included training on the use of scientific instruments and ingenious ways of measuring and recording and the art of disguise. They were drilled to take steps of a fixed length which remained constant even while climbing up, down, or walking on a level surface. They were trained to record the distances by counting their steps. A mile was calculated to be around 2,000 steps. To avoid suspicion, these explorers went about their task disguised as monks or traders or whatever suited the situation.

Thus, prepared and trained, the explorers travelled for months at a stretch, collecting intelligence under the most difficult conditions, travelling closely with the natives in caravans. What was to follow were some of the most glorious years in the exploration and mapping of Tibet and all its river systems.

In 1865-66, Nain Singh travelled 1200 miles from Kathmandu to Lhasa and then to Lake Manasarovar and back to India.

On a second voyage, in 1867, Singh explored western Tibet and visited the legendary Thok Jalung gold mines. He noticed that the workers only dug for gold near the surface, because they believed digging deeper was a crime against the Earth and would deprive it of its fertility.

His last and greatest journey was from Leh in Ladakh via Lhasa to Assam in 1873-75. For his extraordinary achievements and contributions, Nain Singh was honoured with many awards by the Royal Geographical Society.

SubQuestion No : 68

Q.68 Which place did Nain Singh Rawat belong to?

- Ans
- 1. Shillong
 - 2. Kumaon
 - 3. Ladakh
 - 4. Guwahati

Question ID : 9767556573

Status : Answered

Chosen Option : 2

Comprehension:

Read the following passage and answer the questions given after it.

Nain Singh Rawat (1830-1882) was one of the 19th century Indian explorers who explored the Himalayas for the British. He hailed from the Johar Valley of Kumaon. He is known to be the first Indian explorer to survey Tibet, determine the exact location and altitude of Lhasa, map the Tsangpo (Brahmaputra River) and also give the details of the gold mines of Thok Jalung.

In his youth, Rawat left school and explored different centres in Tibet along with his father. During his exploration, he became familiar with Tibetan people and learnt the language and customs. Later, these same skills sets came handy when he worked as a 'spy explorer'.

In 1855, Rawat was first recruited by German geographers, the Schlagintweit brothers to explore and survey India. Rawat's first exploration trip with the Germans was between 1855 and 1857, when he travelled to Lakes Manasarovar and Rakas Tal and then further to Gartok and Ladakh.
